“Built to task and built to last”

3302 S. New Hope Road • Suite 300-D • Gastonia, NC 28056 • (704) 824-8701 • www.gastontech.com

2005

Service Offerings:

- Web Site Design, Creation, & Updating
- Hosting: web site, email, applications
- Search Engine Optimization
- Software Installation
- Multimedia Production
- Tech Support
- Custom Database Applications and Maintenance
- CRM/Sales Force Automation
- Disaster Recovery
- Network Security
- Data Backup & Recovery
- Software Training
- Workflow and/or Process Tracking
- Virus Scanning and Protection

Notes:

Keep your IIS Server up to date - this should be done at least once per week. You can find updates on the “Downloads” section of www.microsoft.com. Simply type in “IIS” in the search field and look for security updates. This will reduce your exposure to viruses and security loopholes immensely.

Site Hosting and Email Hosting

Your web site must be hosted through an Internet Service Provider (ISP) to be seen on the Internet.

Gaston Technologies has established partnerships with several local ISP's so we are able to provide you with exactly the hosting solution you require - shared hosting on Windows 2000 /

2003 Servers or Linux / Unix Servers, managed hosting, or a hosted application. Our standard rates are extremely competitive but we can also customize a hosting plan to suit your specific requirements.

Cost for shared hosting is \$20.00 per month plus a one-time \$50 setup fee.

Receive a 15% discount by paying \$200 for a full 12 months. *The \$50 setup fee still applies under this discounted method.*

If you require email hosting, we can host your domain and quickly establish POP3 or web-based emails for you as fast as your domain becomes live on the Net.

Web Site Design / Creation

Gaston Technologies' core expertise is the design and creation of web sites. We build custom sites for individuals, small businesses, and large entities.

We can design and build your site, using your graphics, your content, and your ideas for under \$100 per page in most cases.

Should time or creativity be an obstacle, we can discuss your needs and create,

build, and submit various themes, graphics, etc for your approval. Pricing, obviously, is dependent upon your involvement - Please allow us an opportunity to submit a proposal based upon your exact needs.

Web sites coded by Gaston Technologies will be based upon the most current Internet standards and will be cross-browser compliant to ensure that your site is seen

by all visitors exactly the way you intended.

Sites can be build in either a static (unchanging) format or in a dynamic format to allow for frequent content or graphic changes.

Your web site can also be coded with a SQL database should you wish to allow for client logins, shopping carts, or if you may allow clients access to sensitive data.

Web Site Maintenance & Updating

Your web site will need regular updating with new content, photos, etc, as well as database backups and server upgrades. You have several options in this area:

1) Do it yourself.

2) Pay as you need it. We'll do it for you at an hourly charge of \$75 per hour.

3) Annual Retainer. Under this method, we will maintain and update your web site and/or database as needed. We will track our hours spent on task against a “bucket of hours” that are purchased up-front. The attraction to this method is that we reduce our billing rate to \$65 per hour for 12 hours of site maintenance / updating (1 hour per month,

average) over a 12-month period. We will send you monthly statements showing purchased hours versus hours used.

We GUARANTEE your site updates to be “live” on the internet within 2 business days! Major site changes or re-designs, obviously, are not guaranteed within 2 days.
